

ECCO e-Library Keywords

In the re-designed ECCO e-Library, each presentation is assigned one or more **categories**, which are based on the ECCO IBD Curriculum. Each of these categories contain a number of keywords which are then assigned to congress presentations and webcasts within the ECCO e-Library.

Categories:

1. Aetiology of disease (pathogenesis, genetics, immunology)
2. Diagnosis
3. Assessment
4. IBD Multidisciplinary Team (nurses, dietitians, pharmacists, psychologists, etc.)
5. Surgery and IBD
6. Treatment options and individualised care
7. Special situations (e.g. pouchitis, refractory proctitis, fistulising, acute severe UC, stomas, short bowel syndrome, EIM, elderly, traveling, etc.)
8. Endoscopy in IBD
9. Fistulising Crohn's Disease
10. Reproductive health & pregnancy
11. Complications and Co-morbidity
12. Nutrition
13. Psycho-social effects of disease
14. Non-inflammatory symptoms in IBD
15. Paediatrics and Paediatric to Adult transition
16. Novel therapies
17. Basic science
18. Clinical trial design and outcomes
19. Career advice

Keywords:

1. Aetiology of disease

- Dietary factors
- Environmental factors
- Epidemiology
- Exposome
- Genetic factors
- Microbiota
- Natural history
- Smoking

2. Diagnosis

- ANCA, ASCA, other serum markers
- Colitis of uncertain type and aetiology
- Collagenous colitis
- Crohn's disease
- Differential diagnosis
- Histology
- Indeterminate colitis
- Infectious colitis
- Ischaemic colitis
- LGV
- Lymphocytic colitis
- Microscopic colitis
- Ulcerative colitis
- Proctitis
- IBDU
- Eosinophilic enteritis

3. Assessment

- Anti TNF drug levels
- Anti drug antibodies
- Calprotectin and other faecal biomarkers
- Capsule endoscopy
- Colonoscopic surveillance
- Colonoscopy
- CRP and other serum biomarkers
- CT scan
- Disability
- Disease activity Indices
- Dysplasia
- Health economic analysis
- Montreal Classification
- MRI
- Mucosal healing
- Nutritional assessment
- Prognosis
- Upper Endoscopy or Oesophagogastroduodenoscopy
- Patient reported outcomes
- Quality of life (IBDQ)
- Therapeutic drug monitoring
- Thioguanine nucleotides
- Thiopurine methyl transferase (TPMT)
- Ultrasound

4. IBD Multidisciplinary Team

- Dietitian
- IBD nurse
- MDT
- Pharmacist
- Psychologist
- Virtual Biologics meeting

5. Surgery and IBD

- Colectomy
- EUA
- Ileo anal pouch procedure
- Ileo caecal resection
- Ileorectal anastomosis
- Intestinal transplantation
- Laparoscopic surgery
- Post operative complications
- Post operative medical management
- Preoperative management
- Strictureplasty
- Stoma
- Digestive tract damage (Lemann score)

6. Treatment options and individualised care

- 5-ASA
- Adalimumab
- Anti-TNF agents
- Biosimilars
- Budesonide
- Certolizumab
- Ciclosporin
- Corticosteroids
- Complementary therapies
- Dietary therapy
- Golimumab
- Infliximab
- Methotrexate
- Patient choice
- Pharmacogenetics
- Pharmacokinetics
- Prebiotics
- Probiotics
- Tacrolimus
- Treat to target
- Thiopurines (AZA / MP)
- Ustekinumab
- Vedolizumab

7. Special situations

- Arthralgia
- Acute Severe Colitis
- Erythema nodosum
- IBD in the elderly
- Oral Crohn's disease
- Osteopenia / osteoporosis
- Penetrating disease

- Perianal disease
- Perianal fistulae
- Post-operative IBD
- Pouchitis
- Pyoderma gangrenosum
- Proctitis
- Sacroileitis
- Thromboembolism
- Vulval Crohn's disease
- Ocular Manifestations
- Sclerosing Cholangitis
- Non perianal fistulae
- Other extraintestinal manifestations
- Incontinence

8. Endoscopy in IBD

- Autofluorescence
- Balloon enteroscopy
- Capsule endoscopy
- Chromoendoscopy
- Colonoscopy
- Dysplasia
- Endo-microscopy
- Endoscopic therapy
- Mucosal healing
- Narrow band imaging
- OGD
- Pouchoscopy
- Stricture dilatation
- UC colorectal cancer surveillance

9. Fistulising Crohn's Disease

- Abscess
- Perianal disease
- Enterocutaneous fistula
- Enteroenteric fistula
- Enterovaginal fistula
- Enterovesicular fistula

10. Reproductive health & pregnancy

- Fecundity
- Fertility
- IBD and breastfeeding
- IBD in pregnancy

11. Complications and co-morbidity

- IBD-associated cancer
- Associated autoimmune disease
- Clostridium difficile
- Colorectal cancer
- CMV
- Concomitant Infections
- EBV
- Hepatitis B
- Hepatitis C
- Hepatosplenic T cell lymphoma
- HIV

- HPV
- IBD and malignancy
- IBD in the elderly
- Immunisation / vaccination
- Lymphoma
- Malnutrition
- Morbidity
- Mortality
- Obesity
- Tuberculosis
- Vaccination
- Travelling with IBD
- Psychological co-morbidity

12. Nutrition

- Anaemia
- Exclusive enteral nutrition
- Enteral supplements
- Folic acid
- Iron deficiency
- Micronutrients/Macronutrients
- Nutritional status
- Parenteral nutrition
- Vitamin B12 and/or folic acid deficiency
- Vitamin D deficiency

13. Psycho-social effects of disease

- Absenteeism
- Adherence to therapy
- Psychological co-morbidity
- Disability
- Sexuality
- Work productivity
- Coping

14. Non-inflammatory symptoms in IBD

- Fatigue
- FODMAP
- Functional symptoms
- IBS
- Incontinence
- Visceral pain

15. Paediatrics and Paediatric to Adult transition

- Growth
- Paediatric
- Transfer
- Transition

16. Novel therapies (reviewed annually)

- Stem cell transplantation/therapy
- Cell-based therapies
- Etrolizumab
- Faecal microbiota transplantation
- Filgotinib
- Mogensen
- Tofacitinib

- Ozanimod
- JAK inhibitors
- S1P agonist
- Risankizumab

17. Basic science

- Apoptosis
- Aryl hydrocarbon receptor
- Autophagy
- B cell
- Dendritic cell
- Environmental factors
- Epithelial cell
- Epigenetics
- Fibroblast
- Fibrosis
- Genetics
- Immunology
- Innate lymphoid cell
- Intraepithelial lymphocyte
- Lymphocyte
- Macrophage
- Mesenchymal cell
- Metabolomics
- Microbiota
- Neutrophil
- Proteomics
- T cell
- $\gamma\delta$ T cell
- Transcriptomics
- Inflammosomes
- M. Paratuberculosis
- Non-specific immunity
- Defensins
- Paneth cells
- Other

18. Clinical trial design and outcomes

- Real world data
- Outcome measures
- Patient reported outcomes
- Histological remission
- Commercial
- Investigator-led
- Disease activity indices
- Mucosal healing
